

# National Grid Live Line Demonstration

**nationalgrid**

HERE WITH YOU. HERE FOR YOU.

A program for 1<sup>st</sup> responders including DPW, Police, Fire & EMS personnel

**Auto accidents. Fires. Natural disasters. First responders are typically the first on the scene in an emergency and face the greatest risk from utility hazards such as downed power lines.**

National Grid invites you to learn more about these hazards first-hand during a Live Line Demonstration conducted by the company's line mechanics. Scenarios will include "step potential," energized vehicles, ladders coming into contact with conductors, and more.

Electricity always seeks the easiest path to the ground. It will travel to ground through conductors, including water, the human body and metal objects like ladders, poles and fences. The Live Line Demonstration will provide a clear visual reference for this process.

Each demonstration will last approximately 45 to 60 minutes and will be your opportunity to discuss electricity safety with representatives from National Grid.

National Grid will be hosting a Live Line demonstration for first responders and other interested parties at:

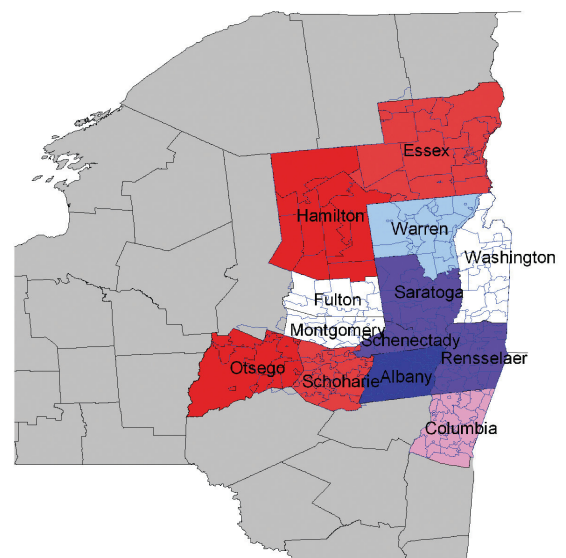

**Schaghticoke Fairgrounds**  
**69 Stillwater Bridge Road, Schaghticoke, NY**  
**May 12, 2016**  
**Show times: 09:00/13:00/19:00**

If you have any questions, please contact:  
William Maloney, Speigletown Fire District Chief at  
chief35@nycap.rr.com

**We look forward to seeing you.**  
**Your safety, and the safety of the public,**  
**depends on it.**
